IT SUPPORT SPECIALIST | OKTA & GOOGLE WORKSPACE | MDM (JAMF/INTUNE) | ONBOARDING & IT OPERATIONS

Dubai, UAE | +971 56 952 0569 | sowedayoub21@gmail.com | Active UAE Visa | Available Immediately

[GitHub](#) | [Portfolio](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

IT Support Specialist with 7 years of experience across help desk, internal IT support, and systems work, including identity and access management (Okta, Google Workspace, SSO, MFA), device management (Jamf, Microsoft Intune), and everyday collaboration tools (Slack, Microsoft 365). Comfortable being the first point of contact for employees — triaging tickets, resolving workstation and account issues, and managing onboarding and offboarding end to end. Uses scripting and automation to cut down repetitive manual work and keep systems running smoothly. Clear, patient communicator who explains technical issues to both technical and non-technical colleagues.

CORE SKILLS

Identity & Access: Okta and Google Workspace administration, SSO, MFA, password resets, account provisioning and deprovisioning

Device & MDM: Jamf (macOS) and Microsoft Intune (Windows), hardware/software diagnosis, workstation and mobile device support

Collaboration Tools: Slack, Microsoft 365 (Teams, Outlook, SharePoint), Google Workspace apps

Networking: TCP/IP, DNS, Wi-Fi, VPN fundamentals, basic UniFi/Ubiquiti configuration

IT Operations: Helpdesk ticketing, onboarding/offboarding workflows, hardware inventory, documentation, knowledge base articles

Application & Systems Support: Business applications, configuration, deployments, hosting, databases, APIs, integrations

Automation: Scripting and workflow automation to cut down repetitive, manual IT tasks

Technical Tools: GitHub, Git, VS Code, MySQL, Supabase, Netlify, Hostinger

PROFESSIONAL EXPERIENCE

IT Support & Systems Specialist | *Blockcube Technical Services LLC* · Seasonal

Feb 2025 – Present | United Arab Emirates · Hybrid

- Act as the first point of contact for internal team members, triaging requests through the ticketing system and resolving hardware, software, and application issues day to day.
- Manage user accounts and access across Okta and Google Workspace, including password resets, MFA, and SSO troubleshooting.
- Handle onboarding and offboarding for new starters and leavers — provisioning accounts and hardware on day one, and revoking access cleanly when someone leaves.
- Support Slack and Microsoft 365 for everyday collaboration, resolving channel, app, and notification issues for the team.
- Maintain and troubleshoot the company website, resolving functionality, performance, and technical problems.
- Monitor website performance and security, carrying out updates, fixes, and routine maintenance.
- Built internal quotation, invoicing, and receipt tools to replace manual processes and reduce repetitive admin work.
- Support business applications and digital systems, including troubleshooting issues involving databases, APIs, hosting, and integrations.
- Troubleshoot everyday connectivity issues across LAN, Wi-Fi, and VPN, including basic UniFi/Ubiquiti network configuration.
- Track hardware inventory and coordinate device replacements and repairs.
- Write and maintain support procedures and internal knowledge base articles so common issues are handled consistently.

IT Support Specialist / Systems Support | *Code & Circuit* · Freelance

Mar 2025 – May 2026 | United Arab Emirates · Hybrid

- Provided technical support and troubleshooting across websites, business applications, hosting environments, and connected systems for multiple clients.
- Set up and supported user accounts and authentication, including SSO and MFA, across different client environments.
- Built and maintained websites and custom business solutions using databases, REST APIs, authentication, and cloud hosting.
- Investigated application errors, configuration issues, connectivity problems, and performance issues, escalating where needed.
- Managed deployments across platforms including Hostinger and Netlify and monitored systems for availability and performance.
- Worked directly with users and clients to understand technical requirements, troubleshoot problems, and deliver practical solutions.
- Used development and automation tools, including GitHub, Copilot, and Cursor, as part of day-to-day technical work.

Ayoub Sowed | IT Support • Systems • Technical Support • AI Automation

Technical Support and Sales Officer | *Soft Point Electronic Chips Programming LLC · Contract*

Oct 2024 – Feb 2026 | United Arab Emirates · Hybrid

- Provided first-line technical support to business clients evaluating electronic programming and embedded hardware solutions.
- Diagnosed technical and product issues and gave clients clear, practical troubleshooting steps.
- Acted as the technical link between customers and engineering teams, gathering requirements and confirming technical specifications.
- Translated technical requirements into clear solutions and recommendations for non-technical customers.
- Supported product demonstrations, technical onboarding, and troubleshooting sessions.
- Maintained accurate customer records, technical documentation, product specifications, and order information.
- Built practical knowledge of electronic hardware, chip programming, compatibility, and technical applications.
- Coordinated with internal teams to confirm technical requirements were understood correctly before fulfillment.

Field Engineer / Web & Systems Support | *Broadmind Automation LTD · Full-time*

Nov 2019 – Jun 2023 | Kampala, Central Region, Uganda · Hybrid

- Started in field engineering, working with industrial control boards, electrical installations, maintenance, and technical equipment.
- Supported installation, testing, troubleshooting, and maintenance of technical systems on-site.
- Built practical problem-solving skills through hands-on field work and equipment troubleshooting.
- Progressed into website and systems support, developing and maintaining the company website.
- Worked on website improvements, SEO, technical maintenance, and digital automation projects.
- Helped identify technical problems, implement solutions, and improve day-to-day business systems.
- Worked across both physical equipment and software systems, building a broad technical foundation.

SELECTED PROJECTS

CashLink: Multi-service digital platform concept combining payments, business listings, community services, and digital workflows.

CareerPilot: Career and resume platform focused on practical job-search workflows, resume creation, and AI-assisted career tools.

ClearBill: Billing, quotation, and invoice management system designed to reduce manual paperwork and streamline business administration.

Iqra School Management System: Education management platform for student records, attendance, and academic workflows, digitizing manual administration.
